

Hockey Canada continues to provide an insurance program that is one of the best in Canadian Sport, reflecting a balance between cost to the participant and coverages that are made available.

As shown in the infographic below, over the past 17 years the premium paid by Hockey Canada participants has remained stable and has delivered effective insurance coverages to our members. In order to continue to ensure we are offering effective coverage Hockey Canada has reviewed the current insurance program and related participant fees to ensure we are meeting the continued growth in Hockey Canada Programming, and that we are offering coverages that assist in supporting the latest in medical treatments and associated costs of injury.

It is also necessary to review the program regularly given the changing insurance markets and the fluctuation in insurance costs experiences over the last two decades.

At the 2017 Winter Congress proposal was made specific to enhancements of selected components of the insurance program and an adjustment to the current insurance fees paid by participants of Hockey Canada both of which were approved by the Hockey Canada Board of Directors.

The insurance fee adjustment, which becomes effective for the 2018-2019 season is an increase from \$16.15 to \$21.30. The adjustment noted will allow Hockey Canada to continue to offer top level coverage for an affordable premium.

We strongly encourage players and families to educate themselves on the policies in place which can be found at hockeycanada.ca/insurance.
